

G4S Risk Management Group

G4S Risk Management Group is the specialist protective services business within G4S Plc. We help our customers succeed by designing and delivering cost efficient risk management services and decision support that enables them to conduct their business safely and successfully in complex, low-infrastructure and challenging environments.

We are a commercial leader in the environmental remediation of the hazards and pollution caused by landmines and explosive remnants of war (ERW), clearing battlefields and providing other ordnance management services, including training, counter-IED and sustainable humanitarian mine action programmes.

■ **Reliable**

■ **Innovative**

■ **Trustworthy**

Who we are and how we operate

We operate globally, both on and offshore supporting reconstruction and development programmes, as well as sustainable humanitarian programmes to remove the menace of landmines and Unexploded Ordnance (UXO). We have completed projects for a wide range of clients, in post-conflict theatres of operations in Africa, Asia, Europe and the Middle-East.

Our Approach

Our clients demand solutions that deliver a reliable, safe, comprehensive and productive service. Unsafe practices impact the overall reputation of the mission. Slow, incomplete or uncertain clearance activities or serious injuries or fatalities jeopardise funding for the work and damage the reputation of the client. We continue to set the standards for our levels of compliance in our operations ensuring we work safely and assuredly. Mission success is as critical to us as it is to our clients.

We place great emphasis on recruiting and retaining high calibre personnel for our operations. This allows us to offer greater guarantees of service delivery and provide continuity between programmes through identifying and learning lessons and sharing best practice.

Our approach to mine action encompasses the need to build local and national capacity through comprehensive training, supervision and management and includes gender sensitive Community Relations and Mine Risk Education. Our qualified, capable and highly experienced staff have an excellent safety record and share a commitment to helping solve the global UXO and ERW problem while providing a safe, quality-assured and cost-effective capability to our clients.

We offer:

- Global experience, regional scale and local delivery
- Responsive and trusted contract management
- Well-conceived operational delivery drawing on our success in projects in countries such as South Sudan, Mali and Iraq
- Determination to drive out unjustified costs
