

MOBILE AND STATIC ARMED SECURITY SERVICES

G4S Mobile and Static Armed Security Services

Over a decade of proven ability to provide quality Protective Security Detachment (PSD) services that safely and securely move clients. These services include the provision of customised security services to international companies and oilfield service providers.

G4S also has a proven history in the delivery of Static Security service solutions that ensure clients and client facilities, accommodation and key infrastructure operate safely and securely from both internal and external threats.

ABOUT US

Backed by the global corporate footprint and purchasing power of G4S plc, G4S Risk Management is a leading provider of risk mitigation, secure support services and integrated solutions to governments, international agencies and multinational corporations, wherever they may operate.

OUR JOURNEY MANAGEMENT SYSTEM

Review of Security Situation

Minimum Operating Security Standards

Prioritisation of Tasks

Reconnaissance

Mission Planning and Route Selection

Team Orders

Preparation

Mission Execution

Conduct

End of Mission debriefs and Administration

G4S Mobile Security

- Protected mobile security services are executed by appropriately configured PSD Teams, consisting of highly qualified, vetted and trained personnel in consultation with clients and as dictated by the number of passengers, the destination, the selected route and the current threat levels in the Area of Operation.
- The risk that G4S accepts is assessed using an industry standard risk assessment process and mitigated through G4S Risk Control Procedures (RCPs) and Standard Operating Procedures (SOPs) to a level that is as low as reasonably possible.
- G4S efficiently, safely and securely conducts tasks in accordance with our own Minimum Operating Security Standards, which often exceed those of our clients and that are aligned to internationally recognised Best Management Practices for the delivery of Security Support Services.
- G4S manages and coordinates the tasking of the PSD teams from secure operations rooms and all teams on task are constantly monitored by the Satellite Tracking provided within the In Vehicle Monitoring System (IVMS) employed in each vehicle.

Risk Management

Our Vision

To become the leading partner of choice for the provision of broad spectrum risk management and support services in complex, low-infrastructure and challenging environments.

Our Mission

We will design, deliver and execute cost efficient risk management support services that enable our customers to conduct their business safely and successfully in complex, low-infrastructure and challenging environments.

Continuous Evaluation and Reorientation

G4S Static Security

- G4S has a proven history in the delivery of Static Security services in conflict afflicted markets. Security solutions include the integration of physical, technical and man guarding to ensure layered protective measures that detect threats at a distance, deny threat avenues of approach, deter potential threat individuals or groups and defeat assailants.
- G4S conducts a formal and detailed threat and security risk assessment. This risk assessment and associated security plan will be submitted for review by the clients prior to any construction or occupation taking place.
